Profile

As a **highly motivated** software engineer who enjoys what he is doing, I am driven by a relentless desire for self-improvement and a deep passion for my work. With a strong focus on **web development**, I bring a wealth of experience working with diverse technologies and frameworks. A **rapid learner** at heart, I thrive on challenges and continuously strive to expand my skill set. My dedication to excellence fuels my enthusiasm for contributing to dynamic and innovative projects.

Professional Experience

Full Stack Engineer

Aug 2021 – present

Augmented Intelligence (Aul) 

Started as a front-end engineer, then switched to becoming a full-stack engineer.

Frontend:

- Leveraged **React.js**, **Redux**, and **Saga** to craft interactive and user-friendly UI components.
- Developed widgets and established a **publish-subscription architecture** in anticipation of the **micro frontends** paradigm.
- Enhanced web performance by **ejecting React** application and **chunking the modules**.
- **Documented** technical implementations and processes.
- Conducted thorough frontend **code reviews**.

Backend:

- Employed **Node.js**, **Express.js**, and **Typescript** to architect robust and scalable microservices.
- Utilized **Kafka** for effective event-driven communication.
- Integrated **MongoDB**, **Firebase**, and **Redis** databases for efficient data management.
- Implemented secure payment processing using **Stripe's** virtual credit cards.
- Created reusable **NPM packages** and managed **BitBucket pipelines** for automated package publishing.
- Established **unit testing**, integrating them into the **CI/CD pipeline**.

- Developed comprehensive technical **documentation** and visualized complex solutions.
- Pioneered **coding standards** and enforced **pre-commit hooks** to maintain code quality.
- Conducted thorough backend **code reviews**.

Full Stack Engineer

Mar 2021 – Aug 2021

EXALT Technologies Ltd. [🔗](#)

- Acted as a **full-stack engineer**, contributing to **end-to-end** project development.
- Utilized **React.js** and **Material UI** to craft visually appealing and responsive user interfaces.
- Executed a high-quality project, employing **Typescript** for a robust and maintainable codebase.
- Implemented **internationalization (i18n)** to cater to a diverse user base.
- Developed support for **multiple themes**, enhancing the user experience through Light and Dark mode options.
- Employed **Flask** and **GraphQL** to create efficient and flexible backend solutions.
- Managed data using **MongoDB**, **Firebase**, and **S3** storage services.

Full Stack Engineer

Jul 2019 – Feb 2021

GeniuCode

- Worked as a part-time **full-stack** web developer.
- Developed and maintained responsive web applications using **Node.js** and **React.js**, ensuring optimal user experiences.
- Collaborated cross-functionally to **meet project requirements** and enhance user experiences.
- **Documented** codebase and facilitated team knowledge sharing.
- Applied **refactoring** techniques to improve code readability and maintainability.

Education

B. Sc. in Computer Engineering

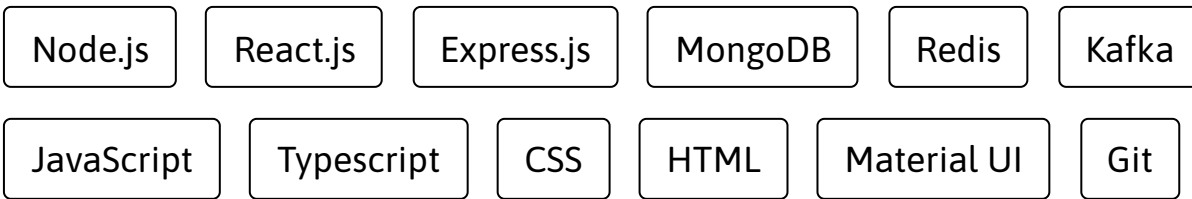

2017 – 2021

An-Najah National University

Nablus

GPA: 3.43

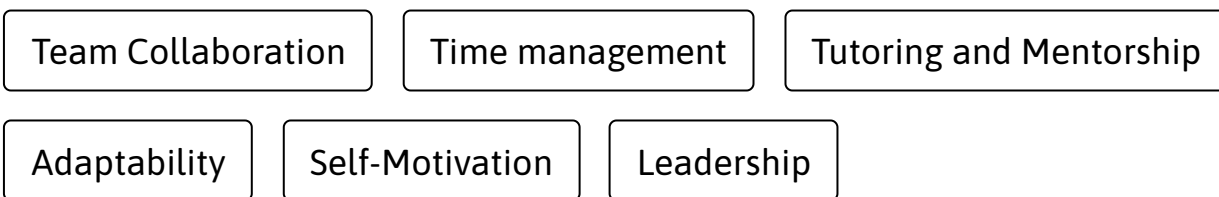

Skills

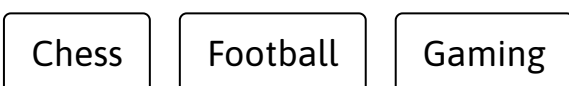

Certificates

- Front-End Web Development with React
- Machine Learning with Python
- Server-side Development with NodeJS, Express and MongoDB
- Rest API (Intermediate) Certificate
- Multiplatform Mobile App Development with React Native
- Redis | RU101 Certificate
